Team plan is offered at a discounted rate for early adopters

Enterprise

- Specifics by negotiation
- Dedicated account manager
- Custom SLAs and security reviews
- Private cloud deployment

Refund Policy

Refunds are not usually available for the use of our KOADX subscription-based
Code Generation services.

This is because the generated code is entirely determined by the model you submit and on a
process that is fully automated.

After generation, the source code is immediately available for secure download, and once that code is
retrieved by you a refund would be inappropriate.

Please contact info@nionnet.com for further details.

A refund/partial-refund will be considered if:-

1: The generated code, once retrieved and without alteration, fails to compile and
Nionnet are in breach of the SLA for resolving the issue

2: The KOADX online portal is consistently unavailable and Nionnet are in breach of the SLA
for resolving the issue.
*Note: Nionnet accepts no responsibility for resolving access failures caused by network restrictions applied by the customer
or in the locality from where the customer is attempting to access the portal.*

3: If there has been an error in billing
